

Solar Project Questionnaire

Selux engineers will need the following info to begin configuring your solar powered luminaire. Please fill out this form and email to Selux Technical Support to begin the specification process at Selux.Technical@selux.com. Please include any additional notes or unique site requirements in your email.

Project Name: _____ Project city/state: _____

Project application: Parking lot Pedestrian Path Pedestrian/Roadway Other: _____

Why are you considering solar powered lighting? (check all that apply)

Location is off-grid LEED points To conserve energy Green project

Other reasons: _____

Which Selux solar luminaire are you considering for your project?

Luminaire	CCT	Pole Height
Antares 4000		
Antares 8000		
Lukida 4000		

Sun Obstruction? Yes No

Motion Detector allowance? _____ hours

Estimated amount of time the luminaire will operate at 100% output based on pedestrian/vehicle activity.

Preferred Operating Profile: This will determine the pre-programmed behavior of the solar luminaire assembly. Select from the table below either Custom Profile - Option 1, **OR** Standard Profile - Options 2 - 10.

Operation Profile	TIME PM	TIME AM	Sunset	Midnight	Sunrise
1	Custom		Specify: Hours PM _____	Dim Level _____ %	Hours AM _____
2	All night 100%		On 100% all night long (This profile not for use with a motion sensor)		
3	All night 30%		Dimmed to 30% all night (This profile intended for use with a motion sensor)		
4	4 hrs 0hrs		On 100%	Dimmed to 30%	
5	6 hrs 0hrs		On 100%	Dimmed to 30%	
6	8 hrs 0hrs		On 100%	Dimmed to 30%	
7	2 hrs 2hrs		On 100%	Dimmed to 30%	On 100%
8	4 hrs 2hrs		On 100%	Dimmed to 30%	On 100%
9	6 hrs 2hrs		On 100%	Dimmed to 30%	On 100%
10	8 hrs 2hrs		On 100%	Dimmed to 30%	On 100%
