Eighth Avenue Place Calgary, Alberta Canada

With the building design inspired by the Rocky Mountains, this twin office tower in Calgary, Alberta is the third tallest in the city. Eighth Avenue Place is the latest, most luxurious office tower to grace the Calgary sky. A truly monumental piece of modern architecture, it is also one of the first certified LEED Platinum office complexes in all of Canada.

Not only does Eighth Avenue Place house some of the most prominent Calgary business leaders, it is a marvel of architectural and sustainable design — making it Calgary's most prominent and luxurious business address.

Selux MTR Columns and wall sconce were selected for this project for energy efficiency, clean design and visual comfort.
