North Ninth Gateway Salinas, Kansas

The North Ninth Gateway is one of two city entryway projects. It is located at the intersection of North Ninth Street and Interstate 70. North Ninth Street was the original northern entryway to downtown Salina. The Gateway is part of a larger entryway project that gives access to the town, yet keeps in continuity with the nearby green-ways, bicycle paths, and trails.

This project involved the retrofit of an existing bridge; replacing the median and adding 15 colorful Selux Corral Columns (“light sticks”) that are angled at 65 degrees. The eye-catching angled pole design of the Corral Columns crisscross activating the “railroad patterned” brick median creating a graphic sculptural symbol that is visible for some distance. The artwork also highlights the small creek that crosses the interstate which is often overlooked due to all the trucks, stops, and motels along the interstate.

Selux Corral Columns create a unique, engaging form that activates the median with uniform lighting. The columns were chosen for their sleek design, durability, and ability to integrate architectural forms and landscapes.

Corral - Diffuse column and bollard
with protective rings

Corral® by Selux is a diffuse family of luminaires consisting of columns and bollards. The protective Corral® rings around the diffuse polycarbonate shielding add a decorative feature, and can be selected in a variety of lit section heights. For columns, choose from a straight or tapered pole with an overall height up to 16 feet.

Corral Column

Construction	Die cast low-copper aluminum · Extruded straight or reverse tapered column
Optic	White, translucent acrylic · UV-stablized
Light Source	LED in 2700K, 3000K, 3500K, 4000K · 90CRI minimum
Light Distribution	Type IV · Type V
Dimensions	Ø8" · Light module 2', 3', or 4' · Overall height from 10' through 16'
Finish	Tiger Drylac certified polyester powder coat finish
Options	GFCI · 0-10V dimming · HiLo Switching · Motion Sensor with optional Photocell
Certificates	NRTL Wet Location · 5 Year LED Warranty · RoHS Compliant · Union Made - IBEW Local 363 · ASTM and PCI for finish · IK10

Corral Bollard

Construction	Die cast and extruded low-copper aluminum · Stainless steel fasteners
Optic	White, translucent acrylic · UV-stablized
Light Source	LED in 2700K, 3000K, 3500K, or 4000K · 90CRI minimum
Light Distribution	Type IV · Type V
Dimensions	Ø8" · Overall bollard height 1 1/2' through 4'
Finish	Tiger Drylac certified polyester powder coat finish
Options	GFCI · 0-10V dimming · HiLo Switching
Certificates	NRTL Wet Location · 5 Year LED Warranty · RoHS Compliant · Union Made - IBEW Local 363 · ASTM and PCI for finish · IK10
