**Luxury Condo
Toronto, ON Canada**

This luxury property in Toronto was in need of distinctive high-end lighting fixtures for the bathroom and closet areas. In order to keep the soft, intimate feel, Kju Circle by Selux Corporation was selected. The crisp lines of the outer optic mixed with the diffuse shielding behind it combine to create a clean, comfortable ambience.

Kju is offered in both Circle and Square, as individual fixtures or combined into configurations for exceptional accent pieces.

Kju - Luminous tiles with precise forms
in circle or square

****Quadratic. Purist. Versatile.**** – Kju Circle and Square integrate freely into any architectural style, offering various mounting opportunities and pattern arrangements for illuminating any room. It is perfect for your office, conference room, waiting areas, retail shops, hallways, and staircases. Circle or Square, Kju conveys character in any setting. Arrange both together in various lighting schemes or separately in different areas of your project - the creativity is limitless as the two luminaires will blend harmoniously together. Configurations of Kju can be customized for larger areas where a unique luminaire is needed. Combine Kju Circle or Square into other shapes and forms for individualized tastes and settings.
